

Dear Suppliers,

Subject: NSG Group – CSR assessment

In line with the expectations of our executive management, customers and other stakeholders to manage our business in a responsible manner, NSG Group is committed to continually improve our Corporate Social Responsibility (CSR). We have therefore set long term strategic objectives to ensure our sustainability. A key enabler to achieve our goal is a world class sustainable supply base and so we have partnered with EcoVadis to assess our key suppliers relative to their Environmental, Social & Governance systems and performance.

Your company has been identified as a key partner, and we are counting on your participation in this program.

We selected EcoVadis, a global leader in the field of CSR assessment, to make this initiative as efficient as possible for both of us. The EcoVadis CSR monitoring platform combines CSR expertise and online tools that will save you time and resources on CSR assessment and reporting in the years to come with:

- **Confidential** and efficient CSR questionnaire and expert analysis
- A CSR Scorecard (which you can share with other clients as well)
- Tools for benchmarking and improving your CSR practices

Participation in this program is a requirement for our key suppliers and your performance results will be integrated into our sourcing process. There are various ways to initiate the EcoVadis assessment and you may well receive an invitation from your NSG Procurement contact or via an EcoVadis e-mail but new suppliers are also encouraged to self-register via the NSG EcoVadis Landing Page <https://invite.ecovadis.com/en/nsg/>

The EcoVadis CSR program is co-financed by NSG Group and you. (Learn more at fees.ecovadis.com). We believe that using EcoVadis' collaborative platform will increase transparency, standardize reporting, facilitate improvement, and significantly reduce your overall CSR workload by allowing you to share your CSR Scorecard with other customers.

We thank you in advance for the time that you will spend in completing this assessment and joining this strategic initiative on which we can work together for a more sustainable future.

With Kind Regards,

Mr. John Wilgar
Chief Procurement Officer – NSG Group
