Subject: Oxiten – CSR assessment

Dear Supplier,

In alignment with our Strategic Sustainability Plan 2030, Oxiten is entering a new chapter in our Corporate Social Responsibility (CSR) journey: we have launched an initiative to measure and monitor social and environmental performance in our supply chain.

Your company has been identified as a key partner, and we are counting on your participation in this program.

In order to make this initiative as efficient as possible for both of us, we have selected the EcoVadis CSR monitoring platform. EcoVadis combines CSR expertise and online tools that will save you time and resources on CSR assessment and reporting in the years to come with:

- Confidential and efficient CSR questionnaire and expert analysis
- A CSR Scorecard (which you can share with other clients as well)
- Tools for benchmarking and improving your CSR practices

Participation in this program is mandatory and your performance results will be integrated into our sourcing process. You should soon receive an invitation email from EcoVadis to begin this process. We kindly ask that you respond without delay.

The EcoVadis CSR program is co-financed by Oxiten and you. (Learn more at <http://fees.ecovadis.com>). We believe that using EcoVadis' collaborative platform will increase transparency, standardize reporting, facilitate improvement, and significantly reduce your overall CSR workload by allowing you to share your CSR Scorecard with other customers.

We thank you in advance for the time that you will spend in completing this assessment and joining this strategic initiative on which we can work together for a more sustainable future.

Best Regards,

João Parolin
