## Sustainability - Our responsibility for people and the environment

Dear Partners and Suppliers,

As a family-owned business aiming for long-term success, we are aware of the importance of prudent corporate management. For us, economic growth goes hand-in-hand with ecological and social thinking. Our sense of responsibility extends to our customers, partners, employees and shareholders, as much as it does to the environment and to society at large.

In alignment with our Endress+Hauser values, our corporate strategy and with the expectations of our shareholders, customers and other stakeholders to manage our business in a responsible manner, Endress+Hauser Flowtec AG is entering a new chapter in our Corporate Social Responsibility (CSR) journey: we have launched a sustainable procurement initiative to monitor social and environmental performance in our supply chain.

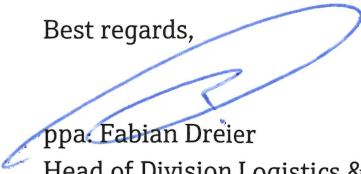

In my role as Head of Division Logistics & Purchasing of Endress+Hauser Flowtec AG, I'm responsible for a sustainable global supply chain and I must ensure that our partners share the same values and commitment to sustainability as we do. Your company has been identified as a key partner, and I'm counting on your participation in this program. To make this initiative as efficient as possible for both of us, we have selected the EcoVadis CSR monitoring platform as our partner of choice. EcoVadis combines CSR expertise with online tools that will help you to streamline your CSR assessment and reporting in the years to come with:

- Confidential and efficient CSR questionnaire and expert analysis
- A CSR Scorecard, which you can also share with other customers and partners as well
- Tools for benchmarking and improving your CSR practices

The results of the evaluation will be integrated into our sourcing and supplier review process, and your results will be the basis to foster our long-term business relationship. You should soon receive an invitation email from EcoVadis to begin this process, and I'm personally asking you to start without delay. The EcoVadis CSR program is co-financed by Endress+Hauser and the respective supplier (learn more at "[fees.ecovadis.com](https://fees.ecovadis.com)").

We believe that using EcoVadis' collaborative platform will increase transparency, standardize reporting, facilitate improvement, and significantly reduce your overall CSR workload. I thank you in advance for completing this assessment and joining this strategic initiative on which we can collaborate for a more sustainable future.

Best regards,

  
ppa. Fabian Dreier  
Head of Division Logistics & Purchasing
