

Dear Valued Supplier,

Arconic is a leading provider of aluminum sheet, plate and extrusions, as well as innovative architectural products, that advance the automotive, aerospace, commercial transportation, industrial, packaging and building and construction markets.

Our vision is to deliver sustainable aluminum solutions throughout our value chain, which extends to the business practices of our partners. As the VP of Procurement, **I must ensure that our suppliers are active participants in supply chain sustainability**. You are receiving this letter because goods or services we purchase from you are linked to our sustainability goals which include:

Arconic has chosen **EcoVadis**, a global leader in sustainability ratings based on international standards, to conduct individual sustainability performance assessments of our suppliers. **Your participation in this program is mandatory, and your results and engagement levels in improving will be integrated into our sourcing and supplier review processes.** After taking the assessment, suppliers will be invited to participate in a continuous improvement plan to help improve sustainability capabilities. **This is a collaborative, value chain effort.** I recommend you review [the explanatory videos](#) and documents, [EcoVadis Terms & Conditions](#) and your associated [fees](#) hyperlinked in this document.

To strengthen our approach, we aim to increase the transparency of the environmental impacts in our supply chain. Therefore, your annual data on GHG emissions, energy consumption, water, and waste must be included in your EcoVadis assessment. It's easy to share metrics on the EcoVadis platform and you will be able to benchmark and track your performance year on year. If you upgrade to premium, you will have access to a carbon calculator that enables easy and accurate calculation of Scope 1 & 2 GHG emissions based on global standards. Once registered, please review the [step-by-step process](#) and [how to calculate metrics](#).

Benefits of becoming a rated supplier on the EcoVadis network are:

- **Get rated with confidence!** The methodology is customized to your industry, size, and location and is aligned with international standards. In addition, your data is securely verified by the leading sustainability analysts.
- **Easy-to-understand** sustainability scorecard, **improve** from customized recommendations and [e-learning courses](#), **benchmark** against 200,000+ assessments, and **track and share your progress** with all your customers.
- **Connect** with new trading prospects via a global directory of companies.
- **Standardize** your reporting and **reduce your** overall sustainability **workload**.

I thank you in advance for your investment in joining this strategic initiative for a more sustainable future. Your regular procurement contact is available to answer any of your questions.

Best Regards

Paul Kopatich - VP, Procurement
