

Ref: Ecovadis Assessment for Business PartnersStockholm, November 15th, 2024

Dear Business Partner,

As a global industrial company based in Stockholm, Sweden, the Atlas Copco Group has more than 50.000 employees and customers in over 180 countries. Our industrial ideas empower our customers to grow and drive society forward, creating a better tomorrow. We have many strong brands driving the success of our business and you may be more familiar with supplying to one of our brands. (link to all brands: [Brands – Atlas Copco Group](#))

The Atlas Copco Group continues to strive towards the highest ethical and environmental standards. We have set science-based targets to reduce greenhouse gas emissions in line with the goals of the Paris Agreement. We endorse all the UN Global Sustainable Development Goals and directly contribute to eight of the seventeen goals. New solutions and products are developed to support global sustainable development by increasing our customers' productivity and helping them meet their sustainability ambitions. Sustainable supply chains are also a key contributor ([Atlas Copco Group Business Partner Criteria](#)).

In order to comply with national, European and global legislation (e.g. CSRD, CSDDD) and to measure how sustainable our supply chains are, the Group has decided to work with EcoVadis ([Website Ecovadis](#)). EcoVadis performs customized assessment for invited partners, based on their size, country and industry. The objective of the assessment is to measure the quality of a company's sustainability management system. The EcoVadis methodology includes four main themes, which are the Environment, Labor and Human Rights, Ethics and Sustainable Procurement, based on 21 sustainability criteria aligned with international standards. EcoVadis is a leading provider of ESG ratings, used by many major industrial companies to assess and improve their sustainability practices. We want to help you as an important business partner, to be prepared for the challenges of the future and invite you to join us on our journey to become more transparent and sustainable companies.

The EcoVadis assessment will help indicate the areas of improvements and prepare corrective action plans. Your EcoVadis' scorecard can be shared with other customers and may attract new potential. Please note that there is an annual fee involved ([Ratings Plans & Pricing | Ecovadis](#)). You will soon receive an invitation from EcoVadis to register on the platform and participate in its sustainability assessment. Please do not ignore this invitation. Your participation in the assessment will play a crucial role in our procurement review processes and your future business opportunities with us. Therefore, we strongly encourage you to participate in this assessment.

Trusting that you understand the necessity and criticality of sustainable supply chains, we are looking forward to a positive response and commitment from you. In case of any questions please contact your local sourcing responsible.

With kind regards

Gunter Koyen Akbar Rehman Daniel Strand Huygen
