

Dear Business Partner,

We are excited about our vision for the future as a healthcare company committed to advancing vital organ therapies and patient care, while promoting sustainable and ethical purchasing practices that prioritize the welfare of people, the planet, and future generations.

We are reaching out to you because you play an integral role in helping Vantive achieve our sustainability goals and requirements. The first step on our sustainability agenda is to develop transparency around supplier sustainability status. Vantive has partnered with EcoVadis, a global Corporate Social Responsibility (CSR) rating company that conducts individual sustainability performance assessments of suppliers.

We are asking you to register on the EcoVadis platform and take the assessment. We encourage participation because results will be integrated into our sourcing activities and international regulatory reporting requirements. You can learn more about the scorecard and view EcoVadis support materials on this [website](#).

To learn more about Vantive's sustainability program visit the [Vantive corporate website](#) and if you have any questions contact procurement@vantive.com.

Best Regards,

Darlyne Freedman
Chief Procurement Officer
Vantive Healthcare
