MOMENTIVE
SOLUTIONS FOR A SUSTAINABLE WORLD

TOGETHER FOR
SUSTAINABILITY

“Solutions for a Sustainable World™ - our blueprint for the future”

Dear Valued Supplier,

Momentive is committed to reducing our carbon footprint and making a positive contribution to the health of the Planet. To do this, we need your help. Generally, 80% of a company’s carbon emissions are due to Scope 3 contributors, which are primarily raw materials and the transport of goods. Momentive is no different. To achieve a positive impact, we therefore require your support.

Momentive is committed to doing our part: to reducing our impact through operational excellence in our sites and across our value chain through social, economic, and environmentally sustainable actions and solutions. We must go beyond that to achieve our goals. This requires collaboration with our suppliers, and transformation throughout our value chain. For Momentive, and for me personally, this is an urgent matter, and one that we must address together. This commitment for change is shared through the highest levels of our company.

At Momentive, one of our Core Values is Safety and Sustainability. We prioritize initiatives that positively impact our People, our Products, and our Planet. We will be successful in this endeavor only with the active support of you, our valued Suppliers.

Momentive has become a part of Together for Sustainability (TfS), a member-driven initiative, raising CSR standards throughout the chemical industry. TfS has chosen EcoVadis, a global sustainability rating company based on international standards, to conduct individual sustainability performance assessments of our suppliers. Your participation in this program is encouraged, and your results and engagement levels in improving will be integrated into our sourcing and supplier review processes. We expect to see your CSR data for target reductions and progress. After taking the assessment, suppliers will be invited to participate in a corrective action plan to help improve sustainability results. This is a collaborative effort. Let’s go on this journey of continuous improvement together.

It’s easy to share metrics on the EcoVadis platform and you will be able to benchmark and track your performance year on year. Once registered, please review the [step-by-step process](#) and [how to calculate metrics](#). I thank you in advance for your investment in joining this strategic initiative for a more sustainable future. Your regular procurement contact is available to answer any of your questions.

Best Regards,

Howard G. Peschel
