Sr. Vice President, Global Supply Chain

RTX

“Creating a more sustainable and resilient supply chain for our future.”

Dear valued supplier,

You are receiving this letter today requesting your support of the RTX Sustainable Supply Chain initiative. As part of our supply chain sustainability program, we are collaborating with the [International Aerospace Environmental Group \(IAEG\)](#) to implement a standard for assessing, managing, and reporting ESG risk in aerospace supply chains. By promoting responsible practices and greater transparency, we aim to create a more sustainable and resilient supply chain for the future.

EcoVadis, a global leader in sustainability ratings, will power the sustainability assessment and benchmark our suppliers' sustainability performance against a standard industry framework. This will enable informed business decisions, duty of care compliance obligations, sustainability reporting and positive change in environmental and social topics. By embracing a common approach, suppliers will benefit from only completing one sector-level assessment rather than multiple ones.

In my role as Sr. Vice President of Supply Chain at RTX, I want our suppliers to share our commitment to sustainability. The first step on our sustainability agenda is to understand where our supply base is relative to sustainability performance and initiatives. This information is leveraged in the RTX assessment as we continue to mature in our journey.

We are asking you to register on the EcoVadis platform and take the assessment, regardless of where your company is in its sustainability journey. After you complete the assessment, EcoVadis will provide you with a sustainability scorecard with detailed insights into your company's strengths and recommendations for continuous improvement. **Suppliers are not required to answer any questions that they believe are inconsistent with applicable law.**

Your procurement point of contact will be available to answer any questions about how the EcoVadis assessment supports RTX's sustainability programs and goals.

Thank you in advance for investing your time in completing this assessment and for joining this strategic initiative to create a more sustainable future.

Best regards,
Ed Dunn
Sr. Vice President, Global Supply Chain
