

Jeff Tapley
Chief Operating Officer
Digital Realty

Dear Valued Partner,

Our stakeholders rely on us to deliver our purpose to bring companies and data together, in bold new ways, to power the innovation determining our future. We serve more than 5,000 customers in over 300 data centers across the globe, so it is essential that we deliver data center services in a sustainable and responsible way.

Digital Realty promotes sustainability throughout its business. We are working hard to ensure we reach our sustainability goals and achieving these goals will require your support. Our enhanced supply chain engagement program will support the following objectives:

- Comply with new and emerging international laws and regulations that mandate increasing visibility into, and accountability for, the behavior of vendors in our supply chain.
- Reduce select Scope 3 emissions within Digital Realty's value chain 25% per square foot by 2030 from 2023 levels as part of our global carbon reduction target with the Science-Based Targets Initiative (SBTi).
- Assess social and environmental risks within our supply chain.

The goods or services we purchase from you are directly linked to our sustainability objectives covering the environment, labor and human rights, ethics and sustainable procurement practices. To help us achieve this, Digital Realty uses the EcoVadis platform to monitor its top suppliers and subcontractors across key sustainability criteria. This allows us to track progress and to better understand where our partners may need more support from us on their own sustainability journeys.

We request that you complete this assessment by registering your company on the EcoVadis platform and completing the questionnaire. Following your company's submission, you will receive a sustainability scorecard from EcoVadis with detailed insights into your company's strengths along with areas for improvement. Your scorecard will be integrated into Digital Realty's annual supplier scorecards, and we will be discussing the results in Annual Business Reviews.

Your Digital Realty procurement contact is available to answer questions about how the EcoVadis assessment supports Digital Realty's sustainability programs and goals. You can also reach out to SupplierSustainability@digitalrealty.com. Please take a few minutes to view EcoVadis's explanatory videos, and documents about the EcoVadis assessment, EcoVadis Terms & Conditions and associated fees included in the communication package.

Thank you in advance for investing your time in completing this assessment and for joining us on this strategic initiative and journey towards a more sustainable future.

Best Regards,
JEFFREY TAPLEY
Chief Operating Officer
